

Dev Env

- 1) ssh beagle
- 2) git + ssh on beagle machines
ssh -T git@github.com
git clone / add / commit / push
- 3) autograder
Use Rust version on beagle machines

Claude Code

"1 100 + 3"

The diagram illustrates the parsing of the expression "1 100 + 3". It shows three vertical arrows pointing upwards from the tokens '1', '100', and '+' to their respective positions in the string. Below each arrow is a small 'P' character, likely representing a parser or pointer. The '3' is also present in the string but has no arrow pointing to it.
